

Fiberstars *FX*TM Lights

The Easy, Bright, Multi-Color Lighting System
for New and Existing Pools

The FX Light Series by

FX Light Series – Now, An Affordable, Multi-Colored Pool Lighting System Made for New and Existing Pools.

Fiberstars *FX*TM Light Series

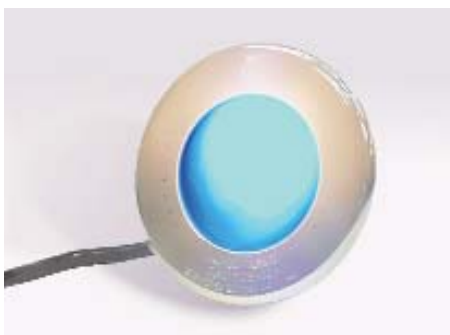

FX Lights illuminate your pool with an array of fixed or continuously changing color, just to match your mood. The radiant color extends your daytime fun and enjoyment into the hours after dark.

These affordable, energy efficient, easy-to-install pool lights operate from one switch, on most automatic control systems. All models are synchronized for multiple light installations. Can be used on pool/spa combinations or for use with our unique 2004-AS illuminator.

FX Lights by Fiberstars give you the latest in pool lighting technology.

Features and Benefits:

- 4 color
- Brightness equivalent to 300+ watts
- Single lamp design
- Energy efficient
- 12 and 120 volt models available
- All models are synchronized
- 3 wire/single control circuit design

FX Sync Spa Light

- 4 color
- Syncs with FX pool lights or our 2004-AS
- 12V or 120V models available

It's a great combination! Ask your pool professional about combining your FX Lights system with Fiberstars' Laminar Flow fountains, Lighted Waterfalls, and other feature lighting. Run them independently for a dramatic multi-colored effect, or synchronize them to enjoy the full ambiance of each color. Note: FX Lights are UL listed for specific Sta-Rite niches and ETL classified for use in specific Pentair & Hayward niches. See installation manual for these specific product niche model numbers.
