## **FRIGIDARIUM**

### **WHAT'S THE FRIGIDARIUM?**

*The Cold Cabin that in many cases called "Frigidarium" is an element which improves appreciably the dilation and contraction of the blood vessels process when a thermal bath, sauna or steam bath session is done, even an hydrotherapy session.*

*It's about a prefabricated cabin in high quality acrylic material to which is incorporated a cooling system which stimulates the terminal contrast process when a sauna or steam bath is abandoned.*

*Frigidarium can incorporate optionally an ice production and dosage especial equipment in the cabin interior.*

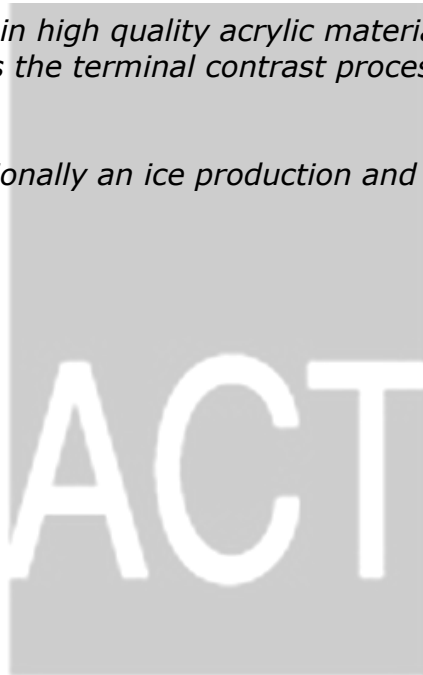

### **BENEFITS**

*Duct contraction.*

*Provides nervous stretching.*

*Muscular relaxation.*

*Circulatory system stimulation*
