

ΑΥΛΙΟΣ ΧΩΡΟΣ

NEBULIZING BITHERMICAL HYDROTHERAPY

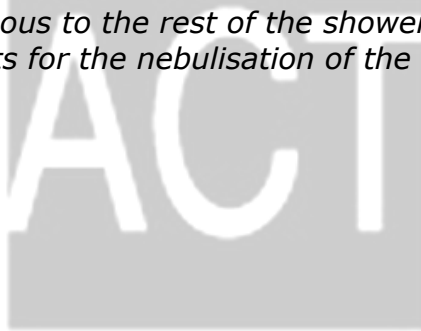

Thermotherapy treatment applied with special shower equipment. Programmable hydrotherapy circuit. Principal function of this shower: relaxation, aromatization.

SHOWER WITH SPECIAL DESIGN SPRINKLER WITH 3 INJECTORS OF ATOMIZED SPRAYING.

Creates a constant nebula atmosphere to soften the thermal contrast in the thermo-playful areas cycles, providing a stimulating relaxation sensation.

Available for construction worked cabins or totally prefabricated, or semi-prefabricated.

Bithermical alternation analogous to the rest of the shower baths although with less violent and more stimulating contrasts for the nebulisation of the created climate.
